

DFID's Vision of Aid Effectiveness

Owen Barder
Director of Global Development Effectiveness
FASID, Tokyo, October 2006

Learning not preaching

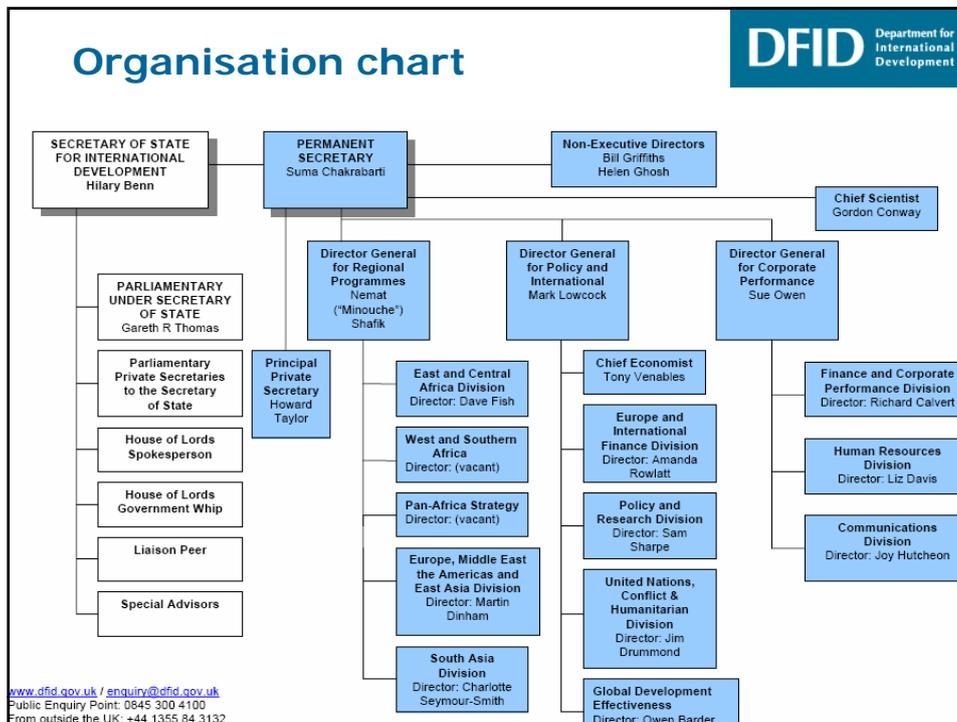

What is DFID?

- All UK aid
 - Bilateral, multilateral, grants, technical cooperation ...
- Development policy (not just aid)
- Cabinet minister (Mr Benn)
- Single mission: poverty reduction
- 3000 staff; budget of \$8 billion rising to \$15 billion in 2010

Organisation chart

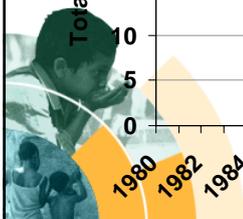

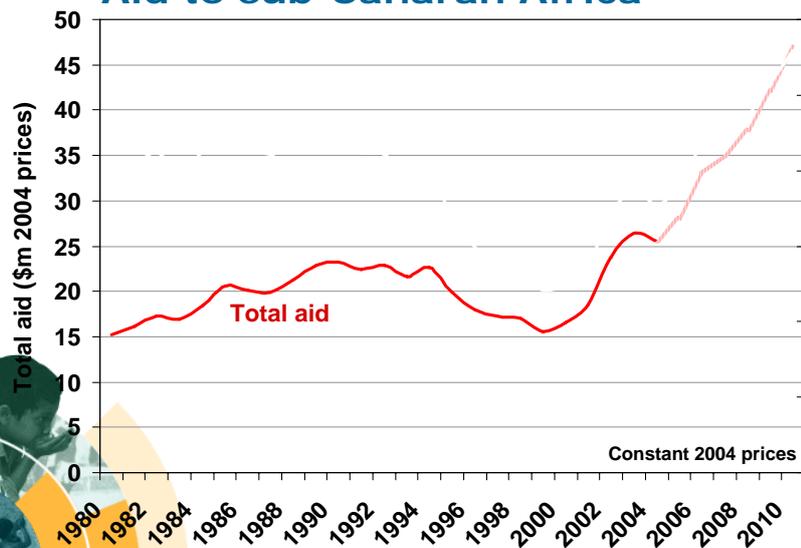

Planned increases in aid

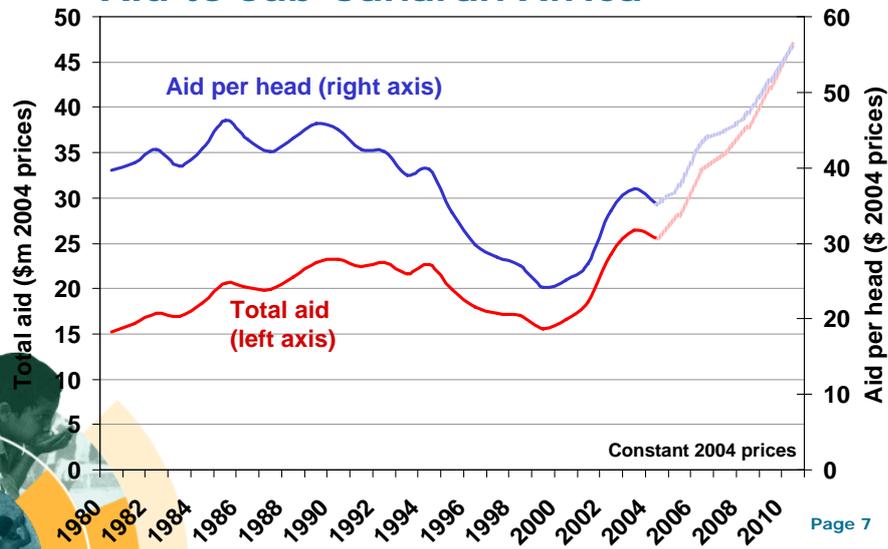

- ❖ Millennium Project
 - ❖ \$194 billion a year by 2015
- ❖ Africa Commission
 - ❖ \$50 billion a year to Africa by 2010
 - ❖ \$75 billion a year to Africa by 2015
- ❖ Gleneagles G8 summit
 - ❖ Additional \$50 billion a year by 2010
 - ❖ Of which half to Africa
- ❖ DAC estimates of commitments
 - ❖ ODA will rise to \$128 billion a year by 2010
 - ❖ 60% increase over 2004

Aid to sub-Saharan Africa

Aid to sub-Saharan Africa

Is current aid effective?

- ❖ Microeconomic testimony
 - ❖ Evaluations and project reviews
 - ❖ Not statistically robust
- ❖ Aid-growth regressions
 - ❖ No clear linear relationship
 - ❖ Strong non-linear relationship
 - ❖ High ROI
 - ❖ Decreasing returns to scale
- ❖ Benefits other than short run growth
 - ❖ Humanitarian, consumption
 - ❖ Long run investment

Broad consensus on effectiveness

- ❖ Evidence not as good as it should be, but
- ❖ Aid effective at current levels, but
- ❖ With diminishing marginal returns
- ❖ So additional aid will be less effective
- ❖ Unless we can deliver it better
- ❖ And we need to show it is effective

Priority reforms

- ❖ Provide predictable aid
- ❖ Support national systems (“alignment”)
- ❖ Measure results not inputs
- ❖ Reduce earmarking to allow better resource use
- ❖ Harmonize and specialize
- ❖ Support economic growth
- ❖ Untie aid to improve cost effectiveness
- ❖ Be transparent

Paris declaration

- **Ownership** - Partner countries exercise effective leadership over their development policies, and strategies and co-ordinate development actions;
- **Alignment** - Donors base their overall support on partner countries' national development strategies, institutions and procedures;
- **Harmonisation** - Donor's actions are more harmonised, transparent and collectively effective;
- **Managing for results** - Managing resources and improving decision-making for results;
- **Mutual accountability**: Donors and partners are accountable for development results.

Page 11

What is budget support?

- a transfer of resources to the partner government's national treasury to support the government's policy and expenditure programme
- allocated, spent and accounted for by government's own financial management systems
- monitoring, conditionality, dialogue always linked to financial aid.

Integrated Projects

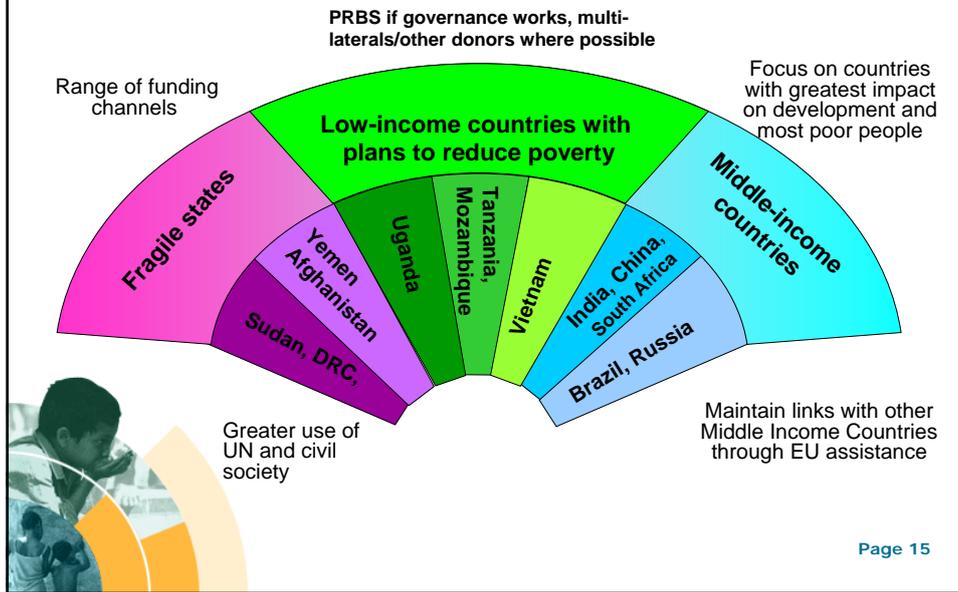

Stand Alone Projects

More alignment

Budget support is one way to improve aid

- Automatic alignment with government programme
- Broader dialogue (PFM, public administration)
- Retains accountability chain
- Lower transactions costs for governments and partners
- Focuses attention and capacity building efforts on national systems
- But it is not the only way to achieve these goals

Choosing instruments

Programme aid

Budget support

General Budget Support

Sector Budget Support

Integrated Projects

Stand Alone Projects

UK target:
50% by 2007/08

Paris target:
66% by 2010

Joint Evaluation of budget support

- Positive effects on harmonisation and alignment – effect beyond budget support
- Expansions in health and education service delivery (but quality and targeting issues)
- Strengthened PFM (fiscal space, efficiency, planning/budgeting)

But...

- Limited effects directly in promoting growth and reducing income poverty
- No impact on domestic accountability and empowerment of the poor
- Positive effects on transparency but no evidence yet of reduced corruption

Page 17

Conclusions

- Aid effectiveness is vital to poverty reduction and to public support for development
- Need instruments that support and do not undermine long term institutional development
- Budget support is particularly effective where possible; but challenges in many environments.
- There are other possible instruments but they must be used carefully.
- Evidence that budget support strengthens alignment, improves governance
- But other interventions also needed to build capacity and increase accountability

Making aid more effective

1. Transactions costs	<ul style="list-style-type: none"> § limit proliferation § use recipient systems § link aid to results
2. Skills shortages	<ul style="list-style-type: none"> § minimize earmarking § improve technical assistance § long-term predictable aid
3. Scarcity of good projects	<ul style="list-style-type: none"> § scale up successful projects § better evaluation
4. Dutch disease	<ul style="list-style-type: none"> § provide long term aid § use aid for imports § investing in competitiveness
5. Macroeconomic volatility	<ul style="list-style-type: none"> § less volatile aid § more predictable aid § save temporary increases
6. Corrodes accountability	<ul style="list-style-type: none"> § use process conditionality § support PRSPs § no additionality requirement
7. Resource curse	<ul style="list-style-type: none"> § aid through budgets § publish what you pay § information campaigns
